

Ideators Limited is a think tank established in the USA in 1980. Ideators Limited has been engaged in the pursuit of ideas, innovations and implementation through problem solving for more than 26 years. Ideators Limited's activities range from developing laser technology applications to developing a musical balloon, from extreme temperature and environment lubrication to miniaturization. Its clientele includes numerous US government entities and corporation; such as the Pentagon for there access authorization system, MERCK for its innovation and support efforts, Urban 2000 for its product development, K Johnson Company for its new ventures analysis and implementation, as well as international parties, such as Mitsubishi Heavy Machinery DiamondIdea Group as its outside advisor and facilitator for new ideas and Bonny Nice Industries to develop a CNC 3D mould making division and integration of the associated production.

Ideators Limited has worked with many clients to develop sourcing of finished products from Asia. With recent changes in the importation restriction, opportunities to market products from the USA have also increased. Ideators Limited works closely with its clients on any and all facets of a project, from R&D to design and production, for items ranging from jewelry to craft kits, garments to fashions accessories, furniture to foodstuffs, power tools to nutritional supplements, grain and commodity trading to air and water treatment and much more. As a full service provider, Ideators Limited possesses and has access to a vast array of international resources.

Ideators Limited has kept pace with the latest technologies and processes utilized in the research, development and production of innovative products. Its was involved in the early exploration and application specific uses of SLA for Rapid Prototyping presentation and demonstration of new concepts.

Roi Tauer, its Managing Director and founder is educated as a Scientist, Engineer, author, businessman and mentor.

He has worked as a Design Engineer for Henry Pratt Company and Austin Builders and Engineers. Mr. Tauer founded and managed Computer Arts, a Data Processing company that specialized in non-traditional applications. Mr. Tauer has implemented unique interactive applications for information sourcing and exchange.
